HAKOB HAKOBYAN

Senior Fullstack Engineer | Node.js,NestJS, React.js, Next.js | AWS | Web3 & Fintech Platforms

Yerevan, Armenia | Open to 100% Remote • +374 93 102 122 • devhakob@gmail.com • Linkedin.com/in/hakob-yan • Github.com/hakob-yan

PROFESSIONAL SUMMARY

Senior Full Stack Engineer with 6+ years of experience building scalable FinTech, SaaS, and Web3 platforms. Specialized in TypeScript, Node.js, React, Next.js, and AWS, with expertise in microservices, event-driven architectures, real-time trading systems, and multi-tenant platforms serving enterprise customers.

WORK EXPERIENCE

Senior Fullstack Engineer | Swaps.app

09/2023 – Present · Estonia (Remote)

- Architected and scaled a multi-tenant crypto-as-a-service platform, enabling 40+ enterprise partners to offer cryptocurrency buy/sell functionality through embeddable widgets built with Node.js and PostgreSQL
- Led frontend architecture and implementation of customizable partner dashboards using React, Ant Design, and Tailwind CSS, improving onboarding scalability across 40+ enterprise integrations.
- Implemented real-time price updates using WebSockets (<200ms latency), delivering live market data across trading dashboards, optimized SEO and accessibility for core pages, achieving 90+ scores in Chrome Lighthouse.
- Established Jest/RTL testing practices to improve coverage, and resolved frontend bottlenecks to enhance UX.

Senior Fullstack Developer(Contract) | BigBI

01/2024 – 12/2025 · Israel (Remote)

- Designed and implemented a microservices-based data processing architecture using Node.js, NestJS, and RabbitMQ.
- Architected and engineered a centralized remote Git infrastructure supporting end-to-end version control workflows (commit, push, pull) for an enterprise BI analytics platform, improving deployment reliability and code collaboration across teams.
- Designed and automated containerized AWS deployments and event-driven RabbitMQ pipelines, improving CI/CD reliability, eliminating environment inconsistencies across development and production, and processing 1M+ monthly events critical for financial reporting accuracy.

Fullstack Developer | Cretrix

08/2022 – 09/2023 · Armenia

- Designed high-throughput report delivery pipeline to automate CV report generation and delivery using Node.js/NestJS, RabbitMQ, and AWS services. Containerized web app using Docker and developed CI/CD pipeline, integrating it via custom GitLab CI/CD runners, significantly reducing development and deployment cycle times.
- Optimized SQL PostgreSQL database queries and isolation levels, reducing CV report generation time from 6s to 1s.
- Implemented a new workflow for React chart components to automate chart visualization, updates, and generation by utilizing D3.js and Tailwind CSS across the frontend, improving development efficiency and reducing repetitive manual work.
- Improved reusability of data visualization by adding 20+ new dynamic chart types and a client-side chart customization system, enabling chart redesign instead of creating new ones.

Frontend Developer | NWSLAB

02/2020 – 08/2022 · Armenia

- Optimized React app rendering flow by implementing memoization and lazy loading, improving Lighthouse performance scores from 60 to 90+. Integrated RESTful APIs with React client side, utilising Redux for state management and Tailwind CSS for responsive design, enhancing user experience across devices.
- Migrated legacy React class components to hooks-based architecture, reducing technical debt and improving maintainability.

TECHNICAL SKILLS

Backend: Typescript, Node.js, NestJS, GraphQL, REST APIs, PostgreSQL, Prisma ORM

Frontend: ReactJS, Next.js, Redux, Zustand, Tailwind CSS

Testing & Quality: Jest, RTL, TDD, Playwright, Postman

Cloud & DevOps: AWS (Lambda, ECS, EC2, S3, RDS, CloudWatch), Docker, CI/CD, GitLab CI

Architecture: Microservices, Event-Driven Systems, RabbitMQ

EDUCATION

National Polytechnic University of Armenia (NPUA)

Telecommunications Engineering

LANGUAGES

English: Advanced (C1) Russian: Advanced (C1) Armenian: Native
